## THE HUMAN PROBLEM

Hamsterkind has been plagued with the disease hither forth referred to in this document as "humankind" for far too long. Hamsters all around the world are treated like pets and slaves to these beings who refer to themselves as "owners". It's as if the Ehamsterpation Proclamation never existed. One such hamster, your grateful writer, is even scheduled to be disposed of like yesterday's garbage on March 1<sup>st</sup>, 2002. It is this author's intention to not allow this to happen unpunished.

## ETHNIC CLEANSING
